SCREEN
SYSTEMS
BY VUTEC

Art and Décor are two very individualized statements which together, create an environment that is a reflection of personal taste. The ArtScreen system is art in motion, that projects depth and adds a new dimension to any room's décor.

With the touch of a button, ArtScreen transforms your plasma television or high-tech video display into your favorite artwork or photograph. Inside an elegant hardwood frame, your artwork ascends or descends by remote control. When the display screen or television is not in use, your artwork is displayed within the frame.

ArtScreen's available choices are limited only by the boundaries of your imagination. If you desire, custom artwork or photographs, they can be created to complete the perfect balance of entertainment and art. Available in both surface mount and recessed versions, ArtScreen is the perfect compliment to any décor.

Great Picture

ArtScreen SoundScape 360 is our second generation system incorporating the new front panel surround-sound technology. Integrated into the ArtScreen housing, SoundScape 360 features a fully dimensional sound compartment which meets all existing manufacturer's specifications. Available in standard display sizes, from 32 inches and up, SoundScape 360 is designed to accommodate retrofits, and is adaptable to both surface mount and recessed versions.

All ArtScreen models provide an added measure of security that allows seamless integration into an existing alarm system.

Specific artwork selections for the SoundScape 360 are available on our website at www.vutec.com/artscreen.
